Portfolio: <https://luan-le.dev/> | GitHub: github.com/Luan2118 | LinkedIn: linkedin.com/in/luan-le-7671b9342

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, HTML, CSS, Tailwind CSS

Backend: Node.js, Express

Databases & Services: PostgreSQL, MongoDB, Supabase

Testing: Vitest, Testing Library

Tools: Git, Vite, npm

Libraries: React Router, Chart.js, Mongoose

PROJECTS

Gym Tracker — React, TypeScript, Supabase, Chart.js | [Live](#) | [Code](#)

- A React and TypeScript application for planning workouts, tracking active sessions, and monitoring long-term progress.
- Built the main user flow from creating a training split and completing an active workout to saving it to workout history.
- Used Supabase to store training splits, workout history, and body weight records.

Finance Tracker — JavaScript, Node.js, Express, MongoDB, Chart.js | [Live](#) | [Code](#)

- A full-stack application for managing income and expenses, featuring user registration and login, protected user data, filtering, charts, and currency conversion.
- Built the frontend for the dashboard, transaction management, filtering, and data visualization.
- Developed an Express backend with a REST API, MongoDB models, input validation, and JWT authentication.

WORK EXPERIENCE

Dispatch Warehouse Supervisor — Chyt' a pust' – Fishing Equipment | Plzeň | 11/2023 – Present

- Coordinate warehouse and dispatch operations, lead a six-person team, work with internal systems, and oversee order preparation and shipment.
